

NATIONAL SHEEP HEALTH STATEMENT (SHS)

Completing this Sheep Health Statement (SHS) will assist prospective buyers to determine the suitability of these sheep for their enterprise. Although the SHS is voluntary in most states, it is mandatory in SA. " fU Yfg]cb (žA UFW ' &\$% Ł

Attached to accompanying NVD/Waybill No.		PIC of the consignment property	
--	--	---------------------------------	--

A: BIOSECURITY INFORMATION

A1. All consigned sheep were born on the consignment property.	Yes	No
A2. The number of different sources of sheep that have been INTRODUCED onto the consignment property in the last 5 years is: 0 (closed flock) <input type="checkbox"/> 1- 5 <input type="checkbox"/> 6+ <input type="checkbox"/> Rams Only <input type="checkbox"/>		
A3. All consigned sheep are from a property with a livestock biosecurity plan. (see note 1) If Yes, Property Plan Regional Biosecurity Plan (name)	Yes	No

B: FOOTROT / LICE / OVINE BRUCELLOSIS

B1. To the best of my knowledge, all consigned sheep are from a flock that is free of VIRULENT FOOTROT. (see note 2)	Yes	No
B2. To the best of my knowledge, all consigned sheep are from a flock that is free of LICE.	Yes	No
B3. All consigned sheep are from a flock in an OVINE BRUCELLOSIS scheme. If Yes, Flock Accreditation No. (except Qld) Expiry Date / / 20	Yes	No

C: OVINE JOHNE'S DISEASE (OJD)

C1. All consigned sheep are from a SheepMAP flock. (see note 3) If yes, Status: Year commenced in SheepMAP:	Yes	No
C2. All consigned sheep are from a flock with a negative test for OJD. (see note 4) If Yes, which test? Faecal 350 within the past 24 months <input type="checkbox"/> Abattoir 500 within the past 24 months <input type="checkbox"/> Abattoir 150 within the past 12 months <input type="checkbox"/> Other (see note 5)	Yes	No
C3. To the best of my knowledge, all consigned sheep are from a flock that is not infected or suspected of being infected with OJD. (see note 6)	Yes	No
C4. All consigned lambs are NLIS 'T' tag (terminal) lambs. (see note 7)	Yes	No
C5. (a) All consigned sheep are Approved Vaccinates. (see note 8) (b) If Yes, I have been continuously vaccinating all retained lambs in the consignment flock for OJD for years.	Yes	No
C6. Sheep INTRODUCED onto the consignment property in the last 5 years were from a flock with: (see notes 3,4 and 8 - multiple answers may be applicable) SheepMAP accreditation <input type="checkbox"/> Negative Faecal 350 <input type="checkbox"/> Negative Abattoir 500 <input type="checkbox"/> Negative Abattoir 150 <input type="checkbox"/> All Approved Vaccinates <input type="checkbox"/> Unknown status <input type="checkbox"/> Other <input type="checkbox"/> (see note 9)		

D: TREATMENT INFORMATION OF CONSIGNED SHEEP

Treatment	Product	Date of Last Treatment
External Parasite Treatment		/ /
Internal Parasite Treatment		/ /
Vaccination (other than OJD)		/ /

E: ADDITIONAL INFORMATION (optional - see note 10)

--

F: DECLARATION (see note 11)

I (full name):
 Address:
 declare that, I am the owner and/or person responsible for the husbandry of the sheep in this consignment and all the information on this Sheep Health Statement is true and correct.
 Signed: Date: / / 20
 Phone Number: Fax number/email:

Producers are advised to retain appropriate records to support this declaration. Persons making false statements may be liable under fair trading and other relevant state legislation.

NATIONAL SHEEP HEALTH STATEMENT

Explanatory Notes

- NOTE 1: **Biosecurity Plan:** Agreed actions and activities of farms and/or producers to prevent the incursion of animal disease(s) into a flock or onto a property. It may outline measures including (but not limited to) conditions on sheep movements into the area, vaccine policy and response to disease detection. These plans can be at a property or regional level and can cover a range of diseases. The National Farm Biosecurity Reference Manual for Grazing Livestock Production and regional biosecurity plan guidelines can be used to develop plans.
- NOTE 2: **Footrot:** Virulent footrot is defined differently in each state. For information on interstate movements of sheep, producers should visit the relevant state department website or contact animal health staff from that department.
- NOTE 3: **SheepMAP:** An audited quality assurance program incorporating a property biosecurity plan, animal health risk assessment, testing, and movement controls that provide a source of low risk animals. (Note: level of testing varies depending on status.)
- NOTE 4: **Faecal 350:** A test of 350 representative sheep over 2 years of age (or all sheep over 2 years of age in smaller flocks) by Pooled Faecal Culture (PFC) or equivalent test in pools of up to 50 sheep. The sheep must have been on the property for at least 2 years.
Abattoir 500: At least 500 sheep, over 2 years of age, have been submitted to an abattoir in the past 24 months, in 1 or more lots, have been examined and all found negative for OJD. The sheep must have been on the property for at least 2 years.
Abattoir 150: At least 150 sheep, over 2 years of age, have been submitted to an abattoir in the past 12 months, in 1 or more lots, have been examined and all found negative for OJD. The sheep must have been on the property for at least 2 years.
- NOTE 5: **Other:** Post mortem examination by a SheepMAP vet with no indication of OJD, or other negative test.
- NOTE 6: **Infected Flocks:** A flock which is infected with OJD, and there is evidence of or likely potential for transmission of infection within the flock, and the flock has not met the requirements for resolution of infection in accordance with the current National OJD Standard Definitions, Rules and Guidelines (SDR&Gs).
Suspected of being infected: A flock is suspected of being infected with OJD if the owner has reasonable grounds to believe that the flock has been exposed to OJD infection or that OJD may exist in the flock, based on:
 - trace back or trace forward contact with an infected flock
 - contact with OJD contaminated land or facilities
 - a positive Johne's disease screening test, e.g. abattoir monitoring or blood (ELISA) test
 - is a neighbour of an infected flock unless there is an effective biosecurity barrier
 - clinical signs of OJD, or
 - advice from the relevant state agricultural department.AND the flock has not met the requirements for resolution of suspicion in accordance with the SDR&Gs.
- NOTE 7: **NLIS 'T' tag (terminal) lamb:** A lamb which is to be slaughtered before it cuts its first permanent teeth and is identified by an NLIS (sheep) 'T' tag. The 'T' tag may be a requirement for trading into some areas.
- NOTE 8: **Approved Vaccinate:** A sheep that is identified by an NLIS (sheep) 'V' tag and is:
 - vaccinated with an approved OJD vaccine by 16 weeks of age, or
 - vaccinated with an approved OJD vaccine after 16 weeks of age, when the flock:
 - was in the SheepMAP, or
 - had undertaken a negative Faecal 350 test in the two (2) years preceding the vaccination, or
 - had a Negative Abattoir 500 status at the time of vaccination.
- NOTE 9: **Other:** This could include sheep sourced from historical Low Prevalence Areas (LPA), or sheep that previously had an ABC score higher than 4, or were from an area with a regional biosecurity plan.
- NOTE 10: **Additional information:** A producer may wish to add additional information pertaining to the consignment and/or consignment flock that is not covered by answering the listed questions. Examples may include historical tests or prevalence areas for OJD, history of OJD vaccination if not continuous, worm resistance test results, where introduced sheep were sourced from, blood lines, micron, breed society, etc.
- NOTE 11: **Declaration:** Signing this declaration has legal significance. Regulatory authorities may take legal action, and purchasers may seek damages for any information that is incorrect. Before signing you must be satisfied you understand all elements of the document, and these explanatory notes.
